## Journals and Conference Proceedings: Previous activity

The list below details journal and conference proceedings searched (previously known as HANDSEARCHING) by Cochrane Kidney and Transplant (CKT) for the identification of randomized controlled trials for the CKT Register of Studies. Handsearching has now been mostly replaced by electronic database searching and electronic screening of journal table of contents and other alert systems.

Those journals and conference proceedings that are now searched electronically are highlighted in red. This list is currently being updated. **Only those journals and conferences that are highlighted in red are updated on this list.**
